Pre()HLB

[Prevention of the spread of HLB in citrus cultivation](#)

PRE-HLB is a project funded by the Horizon2020 Framework Programme whose objective is to prevent the entry of Huanglongbing disease (HLB) into Europe and, if it occurs, to prepare the necessary mechanisms for its effective control in the short, medium and long term.

[New perspectives for the Huanglongbing](#)

The Ministry of Agriculture, Food and Environment has updated, by Royal Decree 491/2020 of 21 April 2020 (<https://www.boe.es/eli/es/rd/2020/04/21/491>), the national programme for the control and eradication of *Trioxa erytreae* and the national programme for the prevention of *Diaphorina citri* and 'Candidatus Liberibacter spp' (CLs).

[PRE-HLB project's website has been nominated for EURid Awards](#)

PRE-HLB website has been nominated for the 2020th edition of EURid Awards. The competition, launched in 2014, is designed to acknowledge the best websites using the .eu, .euo or .eu extensions in five dynamic categories: Leaders, Rising Stars, Laurels, House of .EU and Better World.

[PRE-HLB participates in a study of genetic variability to determine the 'Trioxa erytreae' detected in Cantabria](#)

Yesterday morning Alberto Ferreres, entomologist, and partner of PRE-HLB project was in Novales (Cantabria, Spain) conducting a survey of *Trioxa erytreae* for a study of genetic variability.

[New collaboration between the Deputation of Pontevedra and CSIC for the development of a new project on 'Trioxa erytreae'](#)

The African citrus psyllium, *Trioxa erytreae*, is an insect whose presence in a territory can produce a very high impact, both because of the direct damage it causes but mainly because of its role as a vector of the "Huanglongbing" disease (HLB) or citrus greening, currently considered as the main threat to these plants worldwide.

This project has received funding from the European Union's Horizon 2020 Research and Innovation programme under Grant Agreement N° 817526
